Main page - Light box

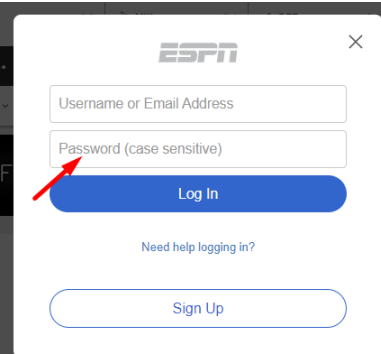

Username box - css= .input-InputLoginValue

The screenshot shows the ESPN login light box. A red arrow points to the 'Username or Email Address' input field. The light box includes a 'Log In' button, a 'Sign Up' button, and a link for 'Need help logging in?'. The background shows the ESPN website with sports scores and a news article about Daniel Snyder.

```
<div data-testid="inputLoginValue-container" class="input-wrapper">
  <input class="input-InputLoginValue" type="email"
    autocomplete="email" autocorrect=
    "off" spellcheck="false" tabindex=
    "0" id="InputLoginValue" data-
    testid="InputLoginValue"
    placeholder="Username or Email
    Address" aria-invalid="false" aria-
    label="Username or Email Address"
    aria-required="true" required
    value>
</div>
<div class="error-container input-error input-error-email input-error-InputLoginValue" style="height: 0px;">
</div>
<label>
  <label data-testid="InputPassword-wrapper" class="input-text input-text-InputPassword" for="InputPassword">...
</label>
<div id="BtnSet-wrapper" class="BtnSubmitSet"></div> (flex)
<div data-testid="HelpSigningIn-container" class="link need-help-signing-in">
```

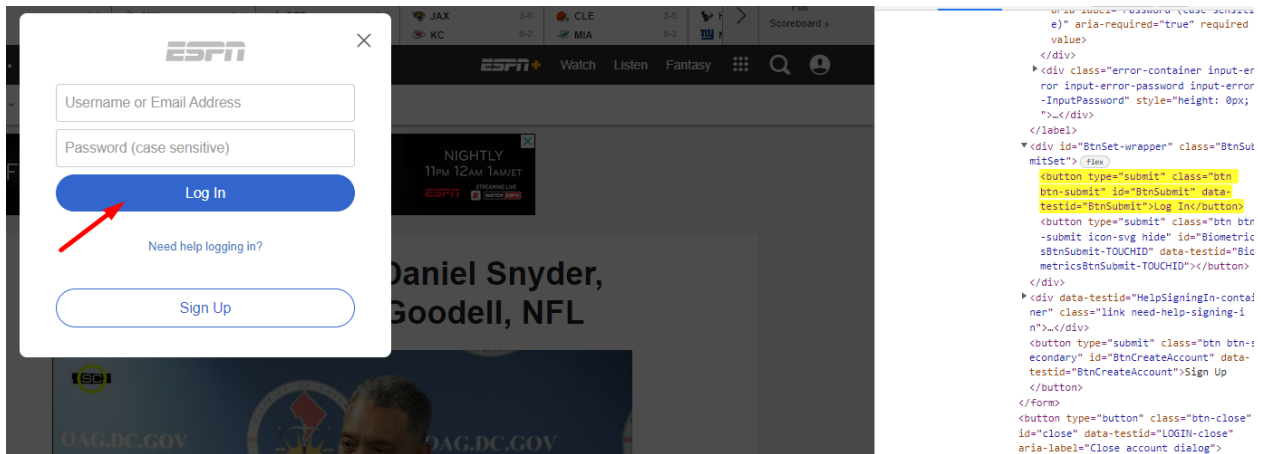

Password box - css= .input-InputPassword

The screenshot shows the ESPN login light box. A red arrow points to the 'Password (case sensitive)' input field. The light box includes a 'Log In' button, a 'Sign Up' button, and a link for 'Need help logging in?'. The background shows the ESPN website with sports scores and a news article about Daniel Snyder.

```
</label>
<label data-testid="InputPassword-wrapper" class="input-text input-text-InputPassword" for="InputPassword">
  <span data-testid="InputPassword-title" class="field-name">Password
  (case sensitive)</span>
  <div data-testid="InputPassword-container" class="input-wrapper">
    <input class="input-InputPassword"
      type="password" autocomplete=
      "current-password" autocorrect=
      "off" spellcheck="false" tabindex=
      "0" id="InputPassword" data-testid=
      "InputPassword" placeholder=
      "Password (case sensitive)" aria-
      invalid="false" aria-label=
      "Password (case sensitive)" aria-
      required="true" required value>
    </div>
    <div class="error-container input-error input-error-password input-error-InputPassword" style="height: 0px;">
    </div>
  </label>
  <div id="BtnSet-wrapper" class="BtnSubmitSet"></div> (flex)
```

Main page - modal

Profile option - css= #global-header .tools

.global-user-container:last-child>ul:first-child>li:nth-child(5)>a

The screenshot displays the ESPN website's user profile modal. The modal is titled "Welcome Laura!" and lists several options: "Manage my:", "ESPN+ Subscriptions", "Edition: US", "ESPN Profile" (highlighted in red), "Newsletters", "TV Provider", "Video Settings", and "Log Out". To the right of the modal, the "FAVORITES" section is visible, showing a message: "No teams in your favorites yet. Add some for quick access!" with a "+ADD FAVORITES" button. The background shows a sports schedule for Sunday, 1:00 PM COT, with games JAX vs CLE and KC vs MIA. On the right side of the image, the HTML code for the modal is shown, with the "ESPN Profile" link highlighted in yellow. The code includes a href attribute pointing to "/members/v3_1/modifyAccount" and a data-behavior attribute set to "overlay".

```
</li>
<li>Manage my:</li>
  ><li>...</li>
  ><li>...</li>
  ><li>
    <a href="/members/v3_1/
      modifyAccount" data-
        language="en" data-behavior=
          "overlay">ESPN Profile</a>
    </li>
    ><li class="noMobile">...</li>
    ><li>...</li>
    ><li>...</li>
    ><li>...</li>
  </ul>
  ><ul class="favs" data-behavior=
    "favorites_mgmt">...</ul>
  </div>
</div>
</li>
  ><li id="scores-link">...</li>
</ul>
</div>
